

## Joel's Story

Joel's life took a sudden turn when he was diagnosed with stage 4 Hodgkin's lymphoma in the summer of 2022 when he was just 9 years old. Prior to his diagnosis, Joel was often tired and not interested in eating. Family members noticed that he looked pale. At first, his doctor thought he might be anemic, but further tests revealed that Joel had cancer.

After a very difficult medical journey, Joel said his best day ever was when he rang the bell at the hospital signalling the end of his chemotherapy treatment! Joel would one day like to find a cure for cancer so that other kids don't have to face what he went through.

Joel loves playing video games with his brother, hanging out with friends, watching hockey, and playing with his wrestling figures. Most of all, Joel loves watching professional wrestling and is an avid fan of the World Wrestling Entertainment (WWE). He would love to see the WWE in person and meet his favourite wrestlers. He can't wait to have the time of his life with his family!

*Still wishing*

**Joel, 10**  
cancer
